PROBLEM

Amateur padel players face three key problems:

- Long match recordings offer little actionable insight.
- Manual score tracking is unreliable and disruptive.
- Players lack tools to review, improve, and share their performance.

SOLUTION

Racket Vision automatically transforms raw match footage into:

- **Advanced match statistics**
- **Real-time score tracking**
- **Auto-generated, social-ready highlight clips**

All powered by AI, from a simple smartphone recording.

PRODUCT

Core Features:

- 🎯 **Match Statistics** (accuracy, heatmaps, forehand/backhand ratio, smartphone integration)
- 🧠 **Real-Time Score Tracking**
- ✂️ **Highlight Generation** (15–30 sec clips with music)
- 📱 **No special hardware needed**—just your smartphone

MARKET

- 🌍 **25M+ players globally**
- NL 3,000+ courts in the Netherlands
- 📈 Explosive growth in amateur padel and tech adoption
- 🎯 Segments: amateur players, clubs, coaches, tournaments, content creators

BUSINESS MODEL

- Monthly subscription (B2C)
- Per match service (casual)
- Free tier for acquisition
- B2B packages for clubs/tournaments

TRACTION & ROADMAP

Progress:

- MVP built
- Real-user interviews/surveys conducted

Next 12 Months:

- All 3 features fully functional
- Club partnerships
- Beta launch
- First paying customers

TECHNOLOGY

- Computer Vision, ML
- Signal Processing
- Scalable cloud-based video processing
- Software engineering
